

Installing ArcGIS Pro on your Personal Computer

Access UW network

Important note: in order to access the link <ftp://software.gis.washington.edu/esri/>, you need to be:

1. On campus, using an internet connection that is part of the UW network or using the [Husky OnNet VPN](#), and
2. Using IE or Firefox (Chrome does not appear to work with this FTP site).

Download ArcGIS Pro from UW's GIS software site

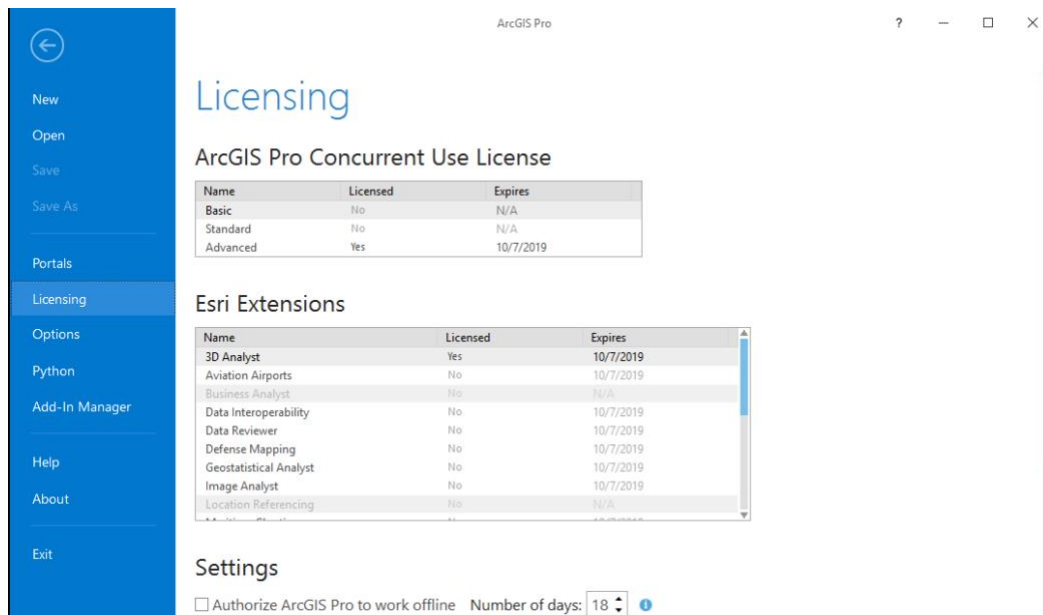

1. Visit: <ftp://software.gis.washington.edu/esri/ArcGISPro/>
2. Navigate to 2.4 (or latest version)
3. Download install file (or latest version): [ArcGISPro_24_169232.exe](#)

Install ArcGIS Pro

1. Review the ArcGIS Pro [system requirements](#) to verify operating system and other environmental prerequisites.
2. Start the ArcGIS Pro installation program and click **Next** when you are ready to proceed.
3. Review the license agreement and **accept** it if you agree. Click **Next** to continue with the installation. You must exit if you do not agree with the terms.
4. Select the installation context in which ArcGIS Pro will install, whether per-machine (all users) or per-user. By default, the per-machine option is selected. Click **Next** to continue.
Note:
If the user running the setup does not have administrative privileges, a per-machine instance of ArcGIS Pro cannot be installed.
5. Click **Change** to specify the installation folder or click **Next** to accept the default location of C:\Program Files\ArcGIS\Pro\
If the installation folder is changed, neither ArcGIS nor Pro is appended to the modified path. It is recommended that the selected custom installation location include a folder and not the root location of a drive.
6. Click **Install** to begin the installation. Note that the [Esri User Experience Improvement](#) check box is checked by default.
7. Click **Finish** to close the wizard when the installation completes. Leave the Run ArcGIS Pro now check box checked if you want to start the application immediately.
8. Optionally, run the offline help setup for ArcGIS Pro by browsing to its installation folder and executing the ArcGISProHelp.msi file.

Authorize

1. Open ArcGIS Pro
2. Go into the licensing tab

Note: if necessary, click on the **About ArcGIS Pro** icon from the splash screen to access the licensing tab

About ArcGIS Pro

3. Scroll down and click on where it says **Configure your licensing options**
4. Choose **Named user license** from the “License Type” dropdown menu
5. Click on the **ArcGIS Online** radio button
6. Enter **https://uw.maps.arcgis.com** in the URL . Click **OK**.
7. You will need to sign in with your UW Net ID and password to finish configuring the license

Licensing

Configure Authorization

Select your authorization type from the drop-down list below:

License Type Named User License [Learn More](#)

Configure your licensing options

Please configure your licensing portal from the options below:

ArcGIS Online

☒  Authorize ArcGIS Pro with a valid ArcGIS Online account

URL https://uw.maps.arcgis.com

ArcGIS Enterprise

☐  Authorize ArcGIS Pro using your ArcGIS Enterprise portal

URL

Example: https://webadaptorhost.domain.com/webadaptorname

Please sign in.
